

ZOLOCHIV
CENTRAL DISTRICT
HOSPITAL

To the national delegate of the Knights of Columbus
Yuriy Maletskyi

Vivat Jesus!

Dear Mr. Yuri and the Knights of Columbus,

I am addressing you as the Head Doctor of Zolochiv Central District Hospital. After the full-scale invasion, the hospital started to treat forcibly displaced people, which number has increased significantly in our region. Zolochiv Central District Hospital is located on the highway of international significance and serves an area where more than 50 thousand people live. After the beginning of war, more than 10,000 forcibly displaced people were officially registered in our district. We provide medical assistance to these people. Also, the number of patients with injuries and wounds who needs immediate treatment has increased significantly.

The hospital which I head now, was my first place of work, where I began my career in medicine as an urologist and head of the reception department. Before the war, I worked as an intensivist in the Republic of Slovakia. After February 24, I returned to Ukraine and began actively volunteer. I also returned to my native hospital and from November 2022 I headed it. For already several years, I also have been a Knight of Columbus in Zolochiv town, at the Church of the Ascension of the Lord. In order to provide assistance to the sick, wounded and traumatized, we need medical equipment that will significantly improve the quality and scope of the services we provide. This is high-precision equipment for providing traumatological and surgical care, namely:

C x-ray arc for trauma operations and prosthetics

Laparoscopic and endoscopic rack for minimally invasive surgery.

This equipment will give us the opportunity to treat various groups of the population in a highly professional way: local residents, forcibly resettled citizens and local veterans. The cost of such equipment is \$50,000.

On behalf of the patients, forcibly displaced people, and personally, the Head Doctor and a Knight of Columbus, I ask you to consider our request and respond to it to the extent that it will be possible.

Glory to Ukraine! Vivat Jesus!

Regards,
Head of Zolochiv Central District Hospital
Taras Yatsunskii
